HIA GREENSMART WELCOMES MCDONALD JONES HOMES

We are happy to report that one of New South Wales leading volume residential home builders, McDonald Jones Homes, has become the Hunter regions first HIA GreenSmart Regional Partner.

Already employing a number of GreenSmart Professionals, McDonald Jones Homes were recently presented with a certificate to recognise the leading role that they are taking to ensure that practical building practices are taken at each stage of construction. These practices include initiatives to increase energy efficiency, reduce water consumption, minimise waste and encourage better environmental management.

McDONALD JONES
YOUR HOME, YOUR DREAM

"We are pleased to be a Regional Partner with HIA in this voluntary industry lead program, a program under which we can demonstrate good practice and leadership", confirmed David Ball, McDonald Jones Homes General Manager.

"We see great value in including HIA GreenSmart as a part of our activities because we believe it is our responsibility to both our clients and to the environment".

McDonald Jones Homes commitment to the GreenSmart program will provide their customers with lower utility bills, a more comfortable home, and a home which will be friendlier to the environment through reduced greenhouse gas emissions and water conservation.

Through our GreenSmart program HIA looks forward to working closely with McDonald Jones Homes to further demonstrate the sustainable, affordable and liveable solutions our industry can produce.

For further information regarding the GreenSmart program and how you can become involved visit www.greensmart.com.au or contact Craig Jennion on 02 4014 2000.
